I Know You're Worried But...

It's difficult to watch sometimes how government works. But rest assured, Social Security checks will still be sent. Our military personnel will continue to get their paycheck. And Government Bonds still have value. There is plenty of money going to the federal government every month for these obligations. If you don't believe me, just look at your next paycheck. The issue here is the Federal (and State and local) governments insatiable appetite for spending. For some reason "trillions of dollars" each year just isn't enough.

So what does this all mean to you and your investments? First, if you currently invest in stocks, bonds (government, muni's or private) and mutual funds, buckle up – it's going to be a bumpy ride. If you don't currently have an experienced professional actively monitoring and managing your market based investments, you should. For this reason, I have partnered with one of the very best management firms in the country. They have access to some of the best money managers in the business today to serve my clients in this area. Give me a call to learn how you can engage their services in managing your funds, including Variable Annuities. It is a simple process and requires very little paperwork to put them to work for you.

If you have been using annuities (with the exception of Variable Annuities) you have the protection you need from market downturns. When you couple that protection with the income guarantees Lifetime Income Riders can provide, you can rest well knowing your future income is safe. If however, your current investments are exposed to potential market downside and this is causing your distress, now might be the time to protect your gains.

Give us a call (512) 554-6086 or email mikes@smithfinancialgrouponline.com and schedule an appointment now to protect your life savings. Or visit our website for even more information - www.smithfinancialgrouponline.com

Sincerely,

Michael Smith
